The W1500 is one family in the W Series of high performance gear pumps and fluid motors. It is a through bore bushing type design constructed of high strength aluminum housings and cast iron end covers. The W Series is suitable for a wide range of equipment applications from material handling, agricultural, construction and paving to aerial lifts, winch and turf care.

The hydraulic performance, flexibility, high efficiency, low and high speed operation, low noise performance and the variety of options have established the W Series as the standard by which other pump performance is measured.

Thiscatalogillustrates the options available for the W1500 family as well as performance and dimensional information. An easy to follow ordering guide is also included.

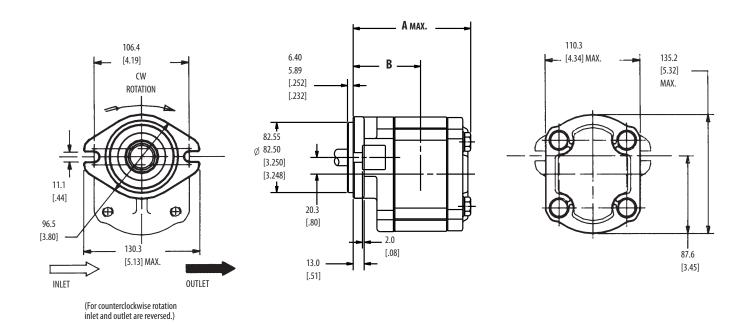

Performance Information

DIMENSIONS & MOUNTING FLANGE OPTIONS

For its displacement and pressure range, the W1500 family features one of the most compact envelopes available from any manufacturer. Standard international mounting flange options are outlined below. Dimensions shown outside of brackets are metric units. See bottom of page 4 for dimensional chart showing "A", "B", "X", and "Y" dimensions.

SAE "A" 2-BOLT ORDER CODE 04

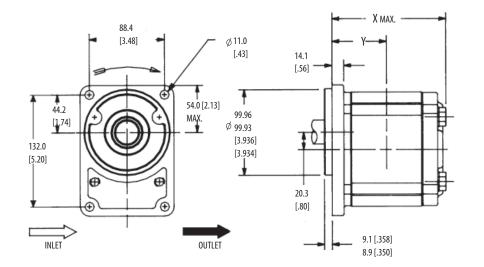

SAE "B" 2-BOLT ORDER CODE 05

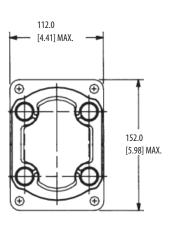

(For counterclockwise rotation inlet and outlet are reversed.)

DIMENSIONS & MOUNTING FLANGE OPTIONS

RECTANGULAR (100.0 mm Pilot) ORDER CODE 08

* NOTE: For port code options 05 & 06, subtract 2 mm from the port centerline dimension on the 19 cc displacement only.

WW NOTE: For port code options 05 & 06, subtract 2 mm from the port centerline dimension on the 28 cc displacement only.

(See dimensional drawings on page 3 and above.)

SHAFT OPTIONS

A critical element which must be considered when specifying a W1500 pump for your application is the shaft drive system. Concentric has both the product and the application experience to insure that your W1500 pump incorporates the correct shaft for your application. The following depict the 9 standard shaft options for the W1500 family. Our flexible manufacturing capabilities can accommodate a wide variety of shaft configurations.

W1500 MULTIPLE PUMPS

The W1500 offers multiple pump configurations up to 4 sections. Multiple pumps provide multiple hydraulic functions from one power source at a significantly lower cost than separate pumps.

The drawings and charts provide dimensional information as well as shaft and coupling load information for W1500 two and three section pumps. If the shaft loading, coupling, and section sequence requirements outlined on page 6 are met, W1500 multiple pumps will exhibit the same performance as W1500 single section pumps outline on the cover of this catalog.

Please contact Concentric for assistance with your four section W1500 pump applications.

Concentric AB-W1500 PUMPS-US-2011-7

W1500 MULTIPLE PUMPS

REDUCED INLET MULTIPLE PUMPS

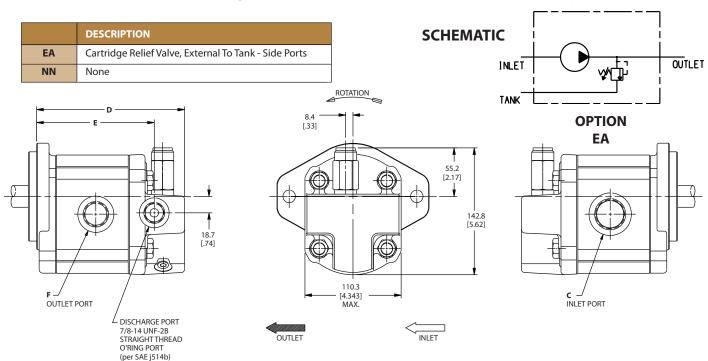

Based on your application requirements the W1500 multiple pump may be supplied with a single inlet on two section pump applications, dual inlets on three section pump applications and 3 inlets on four section applications. Reduced inlets provide overall system savings by reducing the cost of redundant inlet hose and fittings. Contact Concentric regarding your reduced inlet multiple pump application.

(Flange Option 04 shown.)

Consult factory for multiple pumps with more than two sections when using this flange.

REVERSED.

INSTALLATION INFORMATION

DIMENSIONS

Dimensions shown in brackets are in English units. Dimensions shown outside of brackets are metric units.

FLUIDS

Most premium grade petroleum base fluids can be used with W1500 pumps. Optimum operating viscosity is 16-40 cSt (74-185 SSU). Minimum operating viscosity is 10 cSt (59 SSU) at maximum rated pressure and maximum rated speed. Maximum operating viscosity is 750cSt (3409SSU). Maximum cold start viscosity is 2000 cSt (9240 SSU). Contact Concentric for additional information regarding the W1500 performance using other fluids.

OPERATING TEMPERATURES

Fluid temperature range:

Mineral Oil Max. 90°C (194°F) continuous

Max. 105°C (221°F) intermittent

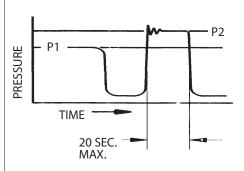

FILTRATION

Proper filtration is critical to the trouble free operation of any hydraulic system. For optimum pump life at maximum pressure ISO 4406/1986 (Code 18/14) is recommended. A 10-micron filter sized to accommodate full system return line flow is recommended for most operating environments.

INLET CONDITIONS

Inlet vacuum should not exceed 0.35 Bar below atmospheric pressure (10 In.Hg.). Continuous operation at vacuums in excess of 0.2 Bar below atmospheric pressure (6 In.Hg.) are not recommended. Max. gauge pressure for pressurized inlet conditions is 2.0 Bar (29 PSI).

PRESSURE RATINGS

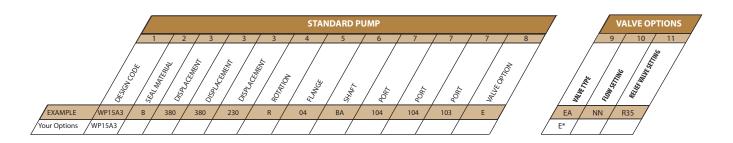

P1 - Continuous

P2 - Intermittent

Total cycle for P2 is 30 seconds.

Above represents performance which can be expected from units incorporating flange port styles.

	190-500	151	N/A	European 4-Bolt Flange (26,18)

* 503 and 504 previously 103 and 104, respectively. 522 and 523 previously 122 and 123, respectively.

Note: Above are standard offerings. For other porting options, please contact factory. Rear ports typically will not allow for catalog rated speeds.

8.		VALVE OPTIONS
	Е	Relief Valve with External Drain
	N	Not Applicable

All pumps require a minimum 25-piece order with the exception of those options designated with "+" (100-piece minimum). A selected number of distributor stock pumps are available with no minimum order quantity. See list on opposite page.

11.	RELIEF VALVE SETTINGS					
	R**					
	**	Relief pressure divided by 100. Available in 100 PSI increments to 4000 PSI. Example: R35 = 3500 PSI				
	NN	Not Applicable				

VALVE TYPE DESIGNATION

EA Relief Valve with External Drain

FLOW CONTROL SETTINGS

NN Not Applicable

NN Not Applicable

Note: Relief valve setting is defined at .25 GPM full bypass.

PRODUCT RANGE

HE Powerpacks

12/24/48 VDC 0.3 - 4.5 kW and 0.75 - 3 kW AC modular power packs

HE Box Powerpacks

12/24/48 VDC modular powerpacks in weatherproof boxes

Pressure Switches

5 - 350 bar, connecting/disconnecting

W100 Hydraulic pumps

0,5 - 2,0 cc 227 bar

W300 Hydraulic pumps

0,8 - 5,7 cc 230 bar

W600 Hydraulic pumps / motors

3 - 12 cc 276 bar

W900 Hydraulic pumps / motors

5 – 31 cc/section 276 bar

Calma The new quiet pumps

6,2 - 23,7 cc/section 250 bar

WQ900 The quiet pumps

5 - 23 cc/section 230 bar

WP900X Hydraulic pumps

16 - 31 cc/section 276 bar

W1500 Hydraulic pumps / motors

19 - 50 cc/section 276 bar

F12 FERRA Heavy duty pumps

16 - 41 cc/section 276 bar

F15 FERRA Heavy duty pumps

19 - 50 cc/section 276 bar

F20/F30 (LS) Hydraulic pumps / motors

23 - 161 cc/section 276 bar

GPA Internal Gear pumps

1,7 - 63 cc/section 100 bar

GC Hydraulic pumps / motors

1,06 - 11,65 cc/section 276 bar

D Hydraulic pumps 3,8 - 22,9 cc/section 207 bar

H Hydraulic pumps 9,8 - 39,4 cc/section 207 bar

II-Stage Hydraulic pumps

4,2 - 22,8 cc/section 276 bar

Rotary Flow Dividers

3.8 - 13.3 cc/section 300 bar

Transmission pumps
